

Term Project

Nehemya McCarter-Ribakoff

April 20, 2017

```
% !TeX program = XeLaTeX * * *
```

```
park.names = read.table("parks.csv", header = TRUE, sep = ",", quote="\"", dec=".")  
species = read.csv("species.csv", header = TRUE, sep = ",")
```

For now, we will use species diversity as our measure

$qD = \{1 / [q-1]\}$
